
User Input
ATAC metadata
• Genomic coords
• Accessibility Δ:
• Binary (T/F)
• Continuous (log2fc)
Chromatin features
• Histone mods
• TFs
Feature Analysis
Feature Matrix
ATAC/ChIP Overlap
Features
Peaks
Random Forest Classification
Predict binary Δ accessibility (BAF-dep/indep)
Ridge Regression
Model quantitative Δ accessibility
Output
• Performance (AUROC)
• Feature Importance (MDI)
MDI
Not predictive
…
Predictive of BAF-dep/indep
Features
• Regression coefficients
Coeff.
Assoc. with accessibility loss
…
Assoc. with accessibility maintenance
